## Profile

I am an open minded, hardworking individual who takes great pride in the work that I carry out. I am currently living in Tokyo, Japan where I am simultaneously working as a freelance web developer and self-studying Japanese.

## Freelance Experience

Please visit my personal site ([www.zewdoo.co.uk](http://www.zewdoo.co.uk)) for a full portfolio of recent freelance work that I have carried out.

Most recent projects include:

## Full Time Experience

**.PHP Developer, Felsted School** Felsted, England October 2009 - July 2011

Felsted is one of the UK's leading private schools and is located in Essex, England. I was hired by Felsted to develop a Management Information System (MIS) that would allow for teaching staff, office staff, pupils and parents to access and produce relevant information such as attendance, medical, report and event data.

The system was launched in September 2010 and is utilized daily by over 970 students, 700 staff members and 1,500 parents.

The MIS has been extremely positively received and was described as 'Outstanding' during a recent (2011) Ofsted inspection.

I have a local copy of this system that I have been given permission to demonstrate if required.

**ColdFusion Developer, Fluent Interaction** London, England May 2009 - July 2009

I was given the task of transforming the British Government's current 'Sustainable Schools' website from static to dynamic, creating an associated content management system which would allow staff to order, edit and create content themselves.

As well as development, I also provided documentation (technical and non-technical) for both end users and for Fluent Interaction's staff.

**Software Engineer, Capgemini** London, England May 2007 - May 2009

I was contracted via Capgemini to lead the Site Build team of the Schoolsweb project, which was the largest web-based system ever commissioned by the British Government.

Tasks included technical development (Verity, CSS, XSLTs) on the actual project as well as the development of testing software (PHP, MySQL). Developing documentation for the software I had created, as well as hosting sessions to guide potential users through it.

**.ASP Developer, Alwen Hough Johnson (AHJ)** London, England October 2005 - July 2006

I was hired by AHJ during my Masters Degree to work remotely on an internet .asp based insurance system.

The system allowed both AHJ Underwriters and insurance brokers to process an application, from when it is first brought to AHJ's attention, all the way through to a quote being produced and producing legally binding certificates.

**.ASP Developer, AIG** London, England September 2003 - September 2004

I was hired by AIG during the work placement year of my degree to be the sole designer of an .asp based intranet system for The Lexington Insurance Company, who fall under the AIG umbrella.

The system essentially allowed employees to input data that was currently being entered into several different spreadsheet and other documents, producing identical documentation and certificates.

The system, originally intended for the Lexington's London based Healthcare Department went on to be utilized by several other departments, by employees in London, Boston, Bermuda and Dublin.

The system was designed using ASP, MSSQL, VBScript and Crystal Report technologies.

**Education**

The University of Hertfordshire — Software Engineering MSc (October 2005 - October 2006)

The University of Hertfordshire — Computer Science BSc (October 2001 - July 2005)

**Skills**

**Heavy Usage (7+ Years of daily usage):**

.PHP

HTML & CSS

JavaScript, JQuery

MySQL

Dreamweaver/Fireworks

SVN

**Medium Usage (4+ Years of fluctuating usage):**

.ASP (Classic & .NET Framework)

.JSP

ColdFusion

Java (RMI, JDBC)

Photoshop

XML, XSLT

UNIX Terminal

## Referrals

"Ian more than anyone on the team was able to work independently and was accordingly given more responsibility from more critical and complex deliverables. Ian was consistently the most reliable employee of the 11 I had in the time. His timekeeping was excellent and his dedication to working past his contracted hours to complete work was of considerable credit to him."

Keith Logan - Senior Consultant, Capgemini ([keith.logan@capgemini.com](mailto:keith.logan@capgemini.com))

"I was introduced to Ian last year when we needed to someone to help design, and develop a complicated on-line underwriting system. Right from the outset Ian had some fantastic ideas which allowed the creative process to develop far quicker than I would have imagined. As soon as we had the system design specification Ian began the complex task of development.

During the past twelve months I have had the privilege of working alongside Ian, and to say that I have been impressed with his immense knowledge, and application to the task at hand is an understatement. Ian has worked solidly and professionally. The system has evolved and we are now at a testing stage. Ian has been involved in every step of the process, and I know that I can rely on him totally - whatever we decide on, he gets the job done, on time, and in a professional manner."

Darren Hurrell - Former Underwriter, AHJ

## Personal

In my spare time I enjoy playing basketball and the acoustic guitar. I enjoy spending time with my friends and try to get at least one bad karaoke session in a month!

I also enjoy photography and adding photos to my portfolio ([www.filtography.com](http://www.filtography.com)).

Thank you for your time.
